DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 22-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 recites the limitation "said second hopper" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 10-17, 26-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Satake et al. (US 5,917,927).

Satake et al. disclose a method and apparatus for selecting and feeding via at least one channel articles to containers comprising auxiliary hopper 26; main hopper 34; selecting means 32 and tapered channels 30 for transporting articles and stopping and removing defective (non-size matching articles); see figures 1-2; sensor means 13; chute 33; vibrating conveyor 47; selecting means 32 comprises a brush which operates

in a sweep mode to clear the channels (it is considered to be operated in cycles) see column 5, lines 24-40; chute 35 transports unselected/uninspected articles to container 36.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-2, 4, 6-9 and 22-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Satake et al. (US 5,917,927).

Satake et al. do not directly disclose feeding selected articles to containers, however the examiner takes OFFICIAL NOTICE that further feeding the selected articles by vibratory feeder in containers would have been obvious to one of ordinary skill in the art as a matter of design choice for packaging. Note that Satake et al. provide that further processing includes multiple alternates; see column 13, lines 6-11.

7. Claims 3, 5, 18, 20-21 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Satake et al. (US 5,917,927) in view of Soloman (US 5,369,940).

Satake et al. disclose tray 31 movably mounted however not connected as a hinged shutter. Soloman teaches tapered tubular guide in vibratory feeder for discriminating between uneven sizes of articles 16 and actuating hinged shutter/deflector 54 by pneumatic cylinder 54 or rotating inner guide leg 84; see figure 8. It would have been obvious to one of ordinary skill in the art to use the hinged shutter

system as taught by Soloman in the invention to Satake et al. in order to move the stopped articles.

Allowable Subject Matter

8. Claims 19 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 19 contains the limitation ejecting means in "means plus function" form and since it meets the analysis set forth in MPEP 2181, the Examiner assumes that applicant wishes to invoke 35 USC 112, paragraph 6.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
